

Timed-Test explanation

We have started taking one-minute timed tests. I put a line showing where the student stopped at one minute. I circle anything that needs to get fixed as well. At the top, I put the number correct over the total number possible. The grade is not recorded in the gradebook. It is solely informational and for practice. If all are finished and correct the first time I grade it, the student moves to the next level. If not, the student receives the test back to finish and correct any mistakes. Once it is finished and corrected, I send it home.
